Concerning the peculiar situation and challenge of OKU community, the committee is already in talks with with Engineer and other experts and bidders to see a forward. It could be noted that, some progress have been made and hopefully soon everything would be sorted out, that the project can start in earnest.

The committee for the project is a six(6) member committee comprising of the following members.

At the committee's previous meetings, it was decided that meeting with the beneficiaries beforehand were necessary and the meetings have been carried out respectively with the various parties involved having expressed their happiness and readiness to accept the project.
